

AIR SAFE ... Why Bounce When You Can Glide.

3 for the price of 1

AIRBOX™ #18018

Simply increase or decrease air pressure in the revolutionary AIRBOX and go from a 15K to an 18K... in seconds!

AIRBOX™ with Slider #18828
Perfect for short box pickups.

Adjustability • Flexibility • Reliability

The AIRBOX Revolution is the most versatile and compact 15K, 16K and 18K Air Hitch system ever designed. Its economically priced and AIRSAFE™ tough. Whether you have a long box or short box and need a regular rail base, slider, or underbed system, the AIRBOX Revolution is your ticket to a First-Class ride at the price of coach. By placing two commercial grade air bags directly below the hitch head it allows us to make a compact air hitch that virtually absorbs trailer to AIRBOX™ forces. Its tough, but light-weight design allows you to quickly and easily remove it from your bed when not needed and quickly re-attach when needed. If you have ever been wondering if an Air Hitch system is for you, here is your answer. You and your passenger deserve the very best.

AIRBOX head floats on 2 heavy-duty air bags giving you the industry's finest ride.

AIR SAFE™

Upgrade Your Current 15K, 16K, or 18K Fifth Wheel Hitch, into a First Class Air System.

You're almost there. You want a world-class air ride system, but have already spent money on the traditional 5th wheel. You're in luck... save money by simply using your existing REESE, HUSKY, VALLEY, or RBW 15K, 16K, or 18K head, towers, and rails. Now remove your existing 5th wheel crossmember, and replace it with the AIRSAFE AIRBOX. It's that easy! Look below and find your AIRBOX™ Air Ride upgrade. Installation is simple, the ride is unbelievable, and your quality of life improved.

Part #	AIRBOX Upgrade*
24150	15K Reese Pro Series

AIR SAFE AIR GOOSENECKS NEW!

Protect Your Precious Cargo.

AIR SAFE GOOSENECKS

7,000 lb. Pin Weight
26,000 lb. GTW

Available in round or square tube

Internal nylon composite allows smooth sliding motion

Simply connects to existing trailer pin

AIRSAFE™ goosenecks are engineered with you and your precious cargo's comfort and safety in mind.

Our exclusive design protects cargo from injury by nearly eliminating shock transferred from the vehicle to the trailer. Our goal is for you and your cargo to "Arrive alive and enjoy the drive". Veterinarian approved and construction industry tough. Prevent vehicle damage and increase your gas mileage. What a great way to save your hard earned money.

- Reduces trailer and content fatigue
- Reduces driver fatigue
- Increase gas mileage
- Your animals will love you
- Increase tire and trailer life

Part #	Description
50100R	Gooseneck, Round Tube
50100S	Gooseneck, Square Tube

The Facts. AirSafe Receivers, Fifth Wheels & Goosenecks.

Safety

With Air Hitches only 10% of the trailer inertia transfers compared to 100% using a hard connection hitch giving you ultimate control. Reduces driver fatigue to help ensure everyone (family, friends, pets, horses, and livestock) arrives alive.

Ultimate Control

- The tow vehicle and trailer track independently giving you greater control and added safety, virtually eliminating all sway.
- Greatly increased braking control since all the weight on the tow vehicle and trailer is distributed evenly giving you increased positive contact when breaking and maneuvering.

Safeguards Against Uncontrollable Road Conditions

Bumps, potholes, expansion joints, curves, hills, and other drivers can be a hazard, keeps you under control when confronted with these conditions.

Saves You Money

Reduces trailer and content fatigue. Metal fatigue caused by traditional towing results in your trailer and its contents taking a beating. Products increase life and help hold value.
